## We Claim:

- 1. A containment tissue, comprising:
- a fiber matrix; and
- at least one treated region comprising a hydrophobic agent applied on the fiber matrix in a predetermined pattern.
- 2. The containment tissue of Claim 1, comprising at least one uncreped through air dried tissue ply.
- 3. The containment tissue of Claim 2, wherein the at least one treated region further comprises a percent rewet of less than about 20% at an applied pressure of 1.0 psi.
- 4. The containment tissue of Claim 3, wherein the at least one treated region further comprises a percent rewet of less than about 15% at an applied pressure of 1.0 psi.
- 5. The containment tissue of Claim 4, wherein the at least one treated region further comprises a percent rewet of less than about 10% at an applied pressure of 1.0 psi.

- 6. The containment tissue of Claim 1, comprising at least one creped Yankee dried tissue ply.
- 7. The containment tissue of Claim 6, wherein the at least one treated region further comprises a percent rewet of less than about 60% at an applied pressure of 1.0 psi
- 8. The containment tissue of Claim 7, wherein the at least one treated region further comprises a percent rewet of less than about 40% at an applied pressure of 1.0 psi.
- 9. The containment tissue of Claim 8, wherein the at least one treated region further comprises a percent rewet of less than about 25% at an applied pressure of 1.0 psi.
- 10. The containment tissue of Claim 1, wherein the at least one treated region further comprises a dryness improvement percent of at least about 25% at an applied pressure of 1.0 psi.

- 11. The containment tissue of Claim 10, wherein the at least one treated region further comprises a dryness improvement percent of at least about 50% at an applied pressure of 1.0 psi.
- 12. The containment tissue of Claim 1, wherein the hydrophobic agent is applied by at least one of printing, spraying, and inkjet printing.
- 13. The containment tissue of Claim 1, wherein the hydrophobic agent comprises a compound selected from the group consisting of alkyl ketene dimers, alkenyl succinic anhydrides, latex compounds, hydrophobic silicone compounds, and combinations thereof.
- 14. The containment tissue of Claim 1, wherein the fiber matrix further comprises synthetic fibers.
- 15. The containment tissue of Claim 1, wherein the at least one treated region has a hydrostatic head value of at least about 5 millibars.
- 16. The containment tissue of Claim 15, wherein the at least one treated region has a hydrostatic head value of at least about 10 millibars.

KCC-2118 78 MDS/S

- 17. The containment tissue of Claim 16, wherein the at least one treated region has a hydrostatic head value of at least about 16 millibars.
- 18. The containment tissue of Claim 1, wherein the at least one treated region has an air permeability value of at least about 25 cfm/min/ft<sup>2</sup>.
- 19. The containment tissue of Claim 18, wherein the at least one treated region has an air permeability value of at least about 60 cfm/min/ft<sup>2</sup>.
- 20. The containment tissue of Claim 19, wherein the at least one treated region has an air permeability value of at least about 150 cfm/min/ft<sup>2</sup>.
- 21. The containment tissue of Claim 1, wherein the at least one treated region has a % Wet/Dry tensile strength of at least about 15%.
- 22. The containment tissue of Claim 21, wherein the at least one treated region has a % Wet/Dry tensile strength of at least about 30%.
- 23. The containment tissue of Claim 1, wherein the at least one treated region has a sizing agent percent add-on of at least about 0.1%.

KCC-2118 79 MDS/S

- 24. The containment tissue of Claim 23, wherein the at least one treated region has a sizing agent percent add-on of at least about 0.5%.
- 25. The containment tissue of Claim 24, wherein the at least one treated region has a sizing agent percent add-on of at least about 1.0%.
- 26. The containment tissue of Claim 1, further comprising at least two treated regions separated by at least one untreated region.
- 27. The containment tissue of claim 26, wherein each treated region comprises a size of at least about 1 square millimeter.
- 28. The containment tissue of Claim 27, wherein each treated region comprises a size of at least about 10 square millimeters.
- 29. The containment tissue of Claim 28, wherein each treated region comprises a size of at least about 75 square millimeters.
- 30. The containment tissue of Claim 29, wherein each treated region comprises a size of at least about 150 square millimeters.

KCC-2118 80 MDS/S

- 31. The containment tissue of Claim 1, further comprising at least two treated regions wherein at least one of the at least two treated is a different size.
- 32. The containment tissue of Claim 1, further comprising at least two untreated regions separated by at least one treated region.
- 33. The containment tissue of claim 32, wherein each untreated region comprises a size of at least about 1 square millimeter.
- 34. The containment tissue of Claim 33, wherein each untreated region comprises a size of at least about 10 square millimeters.
- 35. The containment tissue of Claim 34, wherein each untreated region comprises a size of at least about 75 square millimeters.
- 36. The containment tissue of Claim 35, wherein each untreated region comprises a size of at least about 150 square millimeters.
- 37. The containment tissue of Claim 1, further comprising at least two untreated regions wherein at least one of the at least two untreated is a different size.

KCC-2118 81 MDS/S

- 38. The containment tissue of Claim 1, further comprising a density of less than about 0.25 grams per cubic centimeter.
- 39. The containment tissue of Claim 38, further comprising a density of less than about 0.15 grams per cubic centimeter.
- 40. The containment tissue of Claim 39, further comprising a density of less than about 0.10 grams per cubic centimeter.
  - 41. An absorbent article, comprising:
  - a liquid-permeable body-side liner;
- a containment tissue adjacent to the body-side liner comprising a fiber matrix and at least one treated region wherein a hydrophobic agent is applied to the fiber matrix in the fiber matrix in the at least one treated region;

an absorbent core adjacent the containment tissue; and
a substantially liquid-impermeable outer cover adjacent to the absorbent
core.

42. The absorbent article of Claim 41, wherein at least one treated region comprises a predetermined pattern.

KCC-2118 82 MDS/S

- 43. The absorbent article of Claim 41, wherein the containment tissue further comprises at least one uncreped through air dried tissue ply.
- 44. The absorbent article of Claim 43, wherein the at least one treated region further comprises a percent rewet of less than about 20% at an applied pressure of 1.0 psi.
- 45. The absorbent article of Claim 44, wherein the at least one treated region further comprises a percent rewet of less than about 15% at an applied pressure of 1.0 psi.
- 46. The absorbent article of Claim 45, wherein the at least one treated region further comprises a percent rewet of less than about 10% at an applied pressure of 1.0 psi.
- 47. The absorbent article of Claim 41, wherein the containment tissue comprising at least one creped Yankee dried tissue ply.
- 48. The absorbent article of Claim 47, wherein the at least one treated region further comprises a percent rewet of less than about 60% at an applied pressure of 1.0 psi

KCC-2118 83 MDS/S

- 49. The absorbent article of Claim 48, wherein the at least one treated region further comprises a percent rewet of less than about 40% at an applied pressure of 1.0 psi.
- 50. The absorbent article of Claim 49, wherein the at least one treated region further comprises a percent rewet of less than about 25% at an applied pressure of 1.0 psi.
- 51. The absorbent article of Claim 41, wherein the at least one treated region further comprises a dryness improvement percent of at least about 25% at an applied pressure of 1.0 psi.
- 52. The absorbent article of Claim 51, wherein the at least one treated region further comprises a dryness improvement percent of at least about 50% at an applied pressure of 1.0 psi.
- 53. The absorbent article of Claim 41, wherein the hydrophobic agent is applied by at least one of printing, spraying, and inkjet printing.
- 54. The absorbent article of Claim 41, wherein the hydrophobic agent comprises a compound selected from the group consisting of alkyl ketene

KCC-2118 84 MDS/S

dimers, alkenyl succinic anhydrides, latex compounds, hydrophobic silicone compounds, and combinations thereof.

- 55. The absorbent article of Claim 41, wherein the fiber matrix comprises wood pulp fibers.
- 56. The absorbent article of Claim 55, wherein the fiber matrix further comprises synthetic fibers.
- 57. The absorbent article of Claim 41, wherein the at least one treated region has a hydrostatic head value of at least about 5 millibars.
- 58. The absorbent article of Claim 57, wherein the at least one treated region has a hydrostatic head value of at least about 10 millibars.
- 59. The absorbent article of Claim 58, wherein the at least one treated region has a hydrostatic head value of at least about 16 millibars.
- 60. The absorbent article of Claim 59, wherein the at least one treated region has an air permeability value of at least about 25 cfm/min/ft<sup>2</sup>.

KCC-2118 85 MDS/S

- 61. The absorbent article of Claim 60, wherein the at least one treated region has an air permeability value of at least about 60 cfm/min/ft<sup>2</sup>.
- 62. The absorbent article of Claim 61, wherein the at least one treated region has an air permeability value of at least about 150 cfm/min/ft<sup>2</sup>.
- 63. The absorbent article of Claim 41, wherein the at least one treated region has a % Wet/Dry tensile strength of at least about 15%.
- 64. The absorbent article of Claim 63, wherein the at least one treated region has a % Wet/Dry tensile strength of at least about 30%.
- 65. The absorbent article of Claim 41, wherein the at least one treated region has a sizing agent percent add-on of at least about 0.1%.
- 66. The absorbent article of Claim 65, wherein the at least one treated region has a sizing agent percent add-on of at least about 0.5%.
- 67. The containment tissue of Claim 66, wherein the at least one treated region has a sizing agent percent add-on of at least about 1.0%.

- 68. The absorbent article of Claim 41, wherein the absorbent article comprises a diaper.
- 69. The absorbent article of Claim 41, wherein the absorbent article comprises a swimpant.
- 70. The absorbent article of Claim 41, wherein the absorbent article comprises a training pant.
- 71. The absorbent article of Claim 41, wherein the absorbent article comprises a feminine care product.
- 72. The absorbent article of Claim 41, wherein the absorbent article comprises a medical absorbent product.
  - 73. An absorbent article, comprising:
  - a liquid-permeable body-side liner;
- a containment tissue adjacent to the body-side liner and wrapped around an absorbent core; and
- a substantially liquid-impermeable outer cover adjacent to the wrapped absorbent core;

KCC-2118 87 MDS/S

wherein the containment tissue comprises a fiber matrix including at least one treated region, and at least one sizing agent applied in the at least one treated region.

- 74. The absorbent article of Claim 73, wherein the at least one treated region covers substantially all of a surface of the absorbent core facing the outer cover.
- 75. The absorbent article of Claim 74, wherein the at least one treated region covers sides of the absorbent core.
- 76. The absorbent article of Claim 73, wherein the containment tissue further comprises at least one uncreped through air dried tissue ply.
- 77. The absorbent article of Claim 76, wherein the at least one treated region further comprises a percent rewet of less than about 20% at an applied pressure of 1.0 psi.
- 78. The absorbent article of Claim 77, wherein the at least one treated region further comprises a percent rewet of less than about 15% at an applied pressure of 1.0 psi.

- 79. The absorbent article of Claim 78, wherein the at least one treated region further comprises a percent rewet of less than about 10% at an applied pressure of 1.0 psi.
- 80. The absorbent article of Claim 73, wherein the containment tissue comprising at least one creped Yankee dried tissue ply.
- 81. The absorbent article of Claim 80, wherein the at least one treated region further comprises a percent rewet of less than about 60% at an applied pressure of 1.0 psi
- 82. The absorbent article of Claim 81, wherein the at least one treated region further comprises a percent rewet of less than about 40% at an applied pressure of 1.0 psi.
- 83. The absorbent article of Claim 82, wherein the at least one treated region further comprises a percent rewet of less than about 25% at an applied pressure of 1.0 psi.

- 84. The absorbent article of Claim 73, wherein the at least one treated region further comprises a dryness improvement percent of at least about 25% at an applied pressure of 1.0 psi.
- 85. The absorbent article of Claim 84, wherein the at least one treated region further comprises a dryness improvement percent of at least about 50% at an applied pressure of 1.0 psi.
- 86. The absorbent article of Claim 73, wherein the hydrophobic agent is applied by at least one of printing, spraying, and inkjet printing.
- 87. The absorbent article of Claim 73, wherein the hydrophobic agent comprises a compound selected from the group consisting of alkyl ketene dimers, alkenyl succinic anhydrides, latex compounds, hydrophobic silicone compounds, and combinations thereof.
- 88. The absorbent article of Claim 73, wherein the absorbent article comprises a diaper.
- 89. The absorbent article of Claim 73, wherein the absorbent article comprises a feminine care product.
